

CMS GENERAL INFORMATION

- Some questions/ misconceptions:
 - New students who joined CMS in/after July 2025 must follow the new worksheets and changes in the calendar. *See website for details*
 - Some courses have extra pre-requisites and that is a departmental decision. CMS or science advising cannot exempt you from that.
 - Biol 180 is the new course code for Biol 140. So completing either one is sufficient.
 - Combined major in two disciplines – different from CMS which is 3 disciplines.
- CMSSA – a very useful resource and opportunity to form a network with fellow students whom you may or may not see in classes.
 - Consider joining executives positions – *great for your resume!*
